

This image represents 3' side rails that extends 10' towards the walk aisle and a 8' high by 10' wide back draping for aisle booths, corner booths. For a double booth (10x20 that goes along an aisle), there will not be a center 3' high center rail and drape and the back drape will be 20' long.

Only **one table** is provided to each vendor regardless the number of booths.

OUR SHOW COLORS ARE BLACK BACK-DRAPES
BLACK SIDE-DRAPES & WHITE SKIRTED TABLES

For those that use a double space at the end of two aisles (an End-cap)
This is how the back draping will be. We do not want to have a wall created that will block the vendors behind. Your display should reflect the same as to height.
