JW Marriott Resort - Exhibit Hall

The loading dock area is shown with a **green arrow**. This loading dock area is small and can only handle a few vehicles that back down at a time. This loading dock **does not** have a high dock to back up to. The upper loading dock does, shown with the purple arrow.

Since the loading area is rather small, we are implementing the following plan for loading:

Vendors with trucks or SUV's that have a **large amount of items** to unload, will unload in the dock area show with the **green arrow**. After unloading, please park by the curb along the street, shown with the **red arrow**. (By using the street for vendor parking will leave several hundred parking spaces for the brides.) We will have carts available for your use and will have helpers available to assist you.

Vendors with very large trucks and need a dock to back up to will go to the purple arrow to unload. You will go inside and down the hall to the freight elevator, then go down one floor to the Exhibit Hall.

JW Marriott Resort - Exhibit Hall

Vendors that have a **small amount of items** can unload in the circular drive area shown with the **blue arrow**. Once you've unloaded, it will be important for you to park your car so others can move into the circle to unload. There is plenty of parking nearby.

The Exhibit Hall is shown with the **orange arrow**.

We appreciate your cooperation as we work to get everyone loaded in smoothly.
