

This image represents 3' side rails that extends 10' towards the walk aisle and a 8' high by 10' wide back draping for aisle booths, corner booths. For a double booth (10x20 that goes along an aisle), there will not be a center 3' high center rail and drape and the back drape will be 20' long. **Tables are not included in you space. You are welcome to bring your own or rent one from the show decorator. Their form is below where this page was found.**

OUR SHOW COLORS ARE BLACK BACK-DRAPES  
BLACK SIDE-DRAPES

For those that use a double space at the end of two aisles (an End-cap)  
This is how the back draping will be. We do not want to have a wall created that will block the vendors behind. Your display should reflect the same as to height.
